PRO STARTER KIT

SaaS Launchpad

A premium, production-ready frontend template for your next big SaaS, Agency, or AI startup.

Built with React, Vite, and Tailwind CSS v4

🌟 Core Features

🚀 Marketing Pages

High-converting sections including Hero, Features, Bento Grid, Testimonials, Pricing, and FAQ blocks.

🔒 Auth & Admin

Beautiful Login and Register screens connected to a functional Admin Dashboard with charts and data tables.

🎨 Theming & UI

Full Dark/Light mode support via CSS variables. Includes our beautiful, accessible base UI components.

⚡ Modern Stack

Pre-configured React Router structure powered by the next-gen utility styling engine of Tailwind v4.

📦 Quick Start Guide

01 Install dependencies

```
npm install
# or pnpm install / yarn
```

02 Start the development server

```
npm run dev
```

03 Open in browser

Visit `http://localhost:5173` to view the app in your local environment.

📁 Project Structure

src/components/ui	Base reusable UI components
src/components/marketing	Blocks for the landing page
src/components/admin	Blocks for the dashboard
src/layouts	Layout wrappers (e.g., DashboardLayout)
src/pages	Individual page views (Home, Login, etc.)
src/App.tsx	Main routing configuration

🎨 Customizing the Theme

This starter kit uses **Tailwind CSS v4** with CSS variables for theming. To change the primary brand color, open `src/index.css` and modify the variables in the `@layer base` block:

```
@layer base {
  :root {
    /* Change this to your brand color RGB values */
    --primary-indigo: 79 70 229;
    --accent: #aa3bff;
  }
}
```

🚀 Deployment

This is a standard Vite React application. Deploy it easily to your favorite platforms:

▲ Vercel

1. Push your code to GitHub.
2. Import the repository in Vercel.
3. Vercel automatically detects Vite & builds.

⬡ Netlify

1. Connect your repository.
2. Build command: `npm run build`
3. Publish directory: `dist`
